

22nd STREET NORTH

Improvement Corridor Study Project — Completed December 2023

Study Findings

The goal of the corridor study was to identify responsible solutions that will bring the roadway design up to county standards and through stakeholder engagement, arrive at a recommended solution. Several alternatives were compared using multiple evaluation criteria, vetted through the project management team, and discussed at public open houses. Based on feedback from the community, a preferred alternative was developed in December of 2023.

Preferred Alternative

- Improves grades approaching County Hwy 21 (Stagecoach Trail) and State Hwy 95 (St. Croix Trail)
- Add turns lanes on 22nd Street at County Hwy 21 and State Hwy 95
- Adds paved shoulders with consistent 8' width
- Provides recoverable slopes and establishes clear zone
- Improves drainage and treats runoff
- Minimizes impacts to trees that screen private property
- Meets County and State Aid Design Standards to be placed on the County State Aid System
- Meets the purpose of a County Highway to allow all modes of transportation to move freely and safely—supporting pedestrians, cars, and trucks

Notable expected milestones include:

- February 2024 — West Lakeland Township resolution of support
- 2027 — Final design begins
- 2028 — Property Acquisitions begin
- 2029 — Construction of county road begins
