- 12 mapped comments on layouts
- 19,000 people reached on social media
- 900 project postcards mailed to area households
- 250 people reached via email

Comment summary/themes:

The following are recurring themes that have been identified through feedback gathered from the in-person and online open houses.

- **Pedestrian and bicycle infrastructure**
 - Desire for sidewalk on at least one side of the roadway. Residents are fairly split on preference for sidewalk on just the north side versus both sides of the roadway.
 - Residents like that bikeable shoulders are being proposed in both options.
 - Some desire for improvements regarding the ability for pedestrians to cross the roadway
- **Traffic safety**
 - Like that both options still being considered narrow up the roadway, to help reduce vehicle speeds
- **Property impacts**
 - Most residents do not see the need for on-street parking
 - Residents like the idea of a turf boulevard to help provide additional snow storage
 - Residents appreciated that the two remaining alternatives have a narrower roadway/sidewalk section compared to previously considered concepts.
